Grenadine

Pomegranate juice, sugar and lemon, warmed just until the sugar dissolves.

MAKES **ABOUT 3 CUPS** · ACTIVE **8 MIN** · TOTAL **38 MIN**
KEEPS **ABOUT 1 MONTH, REFRIGERATED**

BEFORE YOU START

- Have a clean airtight bottle and a funnel ready

INGREDIENTS

16 oz	480 ml	Pomegranate juice 100% juice
2 cups		Granulated sugar
2 Tbsp		Lemon juice

METHOD

1. Combine everything in a medium saucepan over medium heat, about **8 min**. Whisk as it warms so the sugar doesn't settle and catch on the bottom. Take it off before it boils.
   ✓ Sugar fully dissolved, small bubbles just starting at the edges
2. Pull from the heat and cool to room temperature, then funnel into the bottle and refrigerate.

NOTES

Riffs

- Thicker: it comes out thinner than bottled grenadine (usually corn syrup and dye). Add more sugar, or hold it at a bare simmer a few minutes longer to reduce.
- A pinch of salt or a splash of vanilla, stirred in after cooking (reader tip).

Make ahead & storage

- Airtight bottle in the fridge, about **1 month**.
- For a longer life, stir a couple tablespoons of vodka into the cooled syrup. It's no longer alcohol-free once you do.

Substitutions

- Classic grenadine is pomegranate juice, water and sugar. This version uses all juice in place of the water, plus lemon for brightness.
- In a pinch, maraschino cherry juice is sometimes used in place of grenadine, though it won't taste of pomegranate.

Used in

- Clover Club, Shirley Temple, Tequila Sunrise, Rum Punch
